-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 14-37 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.

DETAILED ACTION***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the operating system including the drive mechanism, photoelectric barrier, etc., must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

Art Unit: 3634

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-23,25,26,31-34 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hying et al in view of Iseli et al.

Hying et al discloses a roller door having a closing element 14 and a safety edge 20,21, of known structure and operation, column 2, line 64- column 3, line 1, of which a photoelectric device is an obvious choice. What is not shown is the reinforcing spring. However, Iseli et al discloses a elastic door edge sensor that has such a reinforcing member 9, Figs. 3 and 4. It would have been obvious to provide one or more such reinforcing elements to the safety edge 21 of Hying so as to stabilize the edge.

Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hying et al in view of Iseli et al as applied above, and further in view of Strand.

Strand provides additional sealing lips that would have been an obvious addition to Hying et al so as to further seal the bottom of the door.

Claims 27-30 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hying et al in view of Iseli et al as applied above, and further in view of Clark.

Art Unit: 3634

Providing bristle sealing/aligning means in a track for a roller closure is well known, as illustrated by Clark and it would have been obvious to provide such for Hying et al so as to both center the closure and to seal the edges.

Claim 36 rejected under 35 U.S.C. 103(a) as being unpatentable over Hying et al in view of Iseli et al and Clark as applied above, and further in view of Strand.

Strand is applied here as above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
